PROFILE

Artificial Intelligence graduate with hands-on experience building AI-powered applications using Machine Learning, LLMs, RAG, and Agentic AI. Experienced in developing AI solutions through academic projects, cooperative training, and the SDA Agentic AI Engineering Program. Skilled in Python, LangGraph, FastAPI, and LLM integration, with experience building practical AI systems.

EDUCATION

Bachelor of Artificial Intelligence, *University of Hail* 2022 – 2026
GPA: 3.939/4.0 (Excellent)

SKILLS

Technical Skills
- **Programming & Web:** Python, HTML, CSS, JavaScript
- **AI & Machine Learning:** Machine Learning, Deep Learning, NLP, LLMs, Prompt Engineering, RAG, Agentic AI
- **AI Development & Backend:** LangGraph, LangSmith, FAISS, FastAPI, REST APIs, MySQL, SQLAlchemy

Personal Skills
- Problem Solving
- Critical Thinking
- Teamwork
- Communication
- Innovation

EXPERIENCE

Cooperative Trainee, *JODAYN* 06/2025 – 01/2026 | Hail
- Completed a cooperative training program across the **Emerging Technologies** and **Innovation** sectors.
- Applied **Design Thinking** and **Concurrent Thinking** methodologies using **Business Model Canvas, Lean Canvas,** and **SWOT analysis** to support innovation initiatives.
- Developed **SkillRise**, selecting Gemini 2.5 Flash Lite after exploring multiple LLMs.
- Delivered a workshop titled **"Accelerating Innovation"** for participants from both inside and outside the organization.
- Recognized as **Intern of the Month** – October in the Innovation sector.

PROJECTS

Career Compass – Agentic AI Career Platform , *Final Project — SDA Agentic AI Engineering Program*
Developed an Agentic AI platform integrating Job Seeker, Freelancer, and Certification agents using a shared personalized user profile. Built the Job Seeker Agent with a RAG pipeline and validation for personalized job matching and tailored CV generation.
Technologies: Python, LangGraph, Streamlit, RAG, FAISS, LangSmith, LLM Integration

CrisisTrainer – AI-Based Hospital Crisis Training System , *Graduation Project*
Developed an AI-powered hospital crisis training platform that enables supervisors to generate AI-driven crisis scenarios, assign training sessions, evaluate employee performance, and provide automated AI feedback with interactive analytics dashboards.
Technologies: Python, FastAPI, SQLAlchemy, MySQL, LLM Integration, REST APIs, Chart.js

SkillRise – AI-Powered Learning Platform , *Co-op training Project*
Designed and developed an AI-powered training platform that enables supervisors to create technical tasks using AI or manually, evaluate trainee performance, and monitor skill development through interactive dashboards and AI-driven analytics.
Technologies: Python, FastAPI, MySQL, LLM Integration, HTML, CSS, JavaScript

Beauty Product Recommendation System, *Data Mining Project*
Developed a machine learning-based recommendation system for beauty products based on users' skin types. Applied data preprocessing, feature engineering, and trained multiple classification models to evaluate and recommend the most suitable products.
Technologies: Python, Scikit-learn, Random Forest, Naïve Bayes, KNN, Pandas, NumPy

CERTIFICATIONS & TRAINING

Agentic AI Engineering Program — Saudi Digital Academy (SDA) | 280 Hours | Oct 2026
AgentIQ Bootcamp — Cumulocity IoT × NITA | 3-Month Program | Oct 2025
IBM Generative AI Series (3 Courses) — IBM / Coursera | Aug 2025

AWARDS

Excellence Award – Qiyas Readiness Tests, *Education and Training Evaluation Commission (ETEC)*
